Opportunities for manufacturing companies and engineering organisations

"... engineers and industry need to work at inspiring and informing young people about STEM, and Imagineering does exactly that, and very effectively" Investing in the Engineers of the Future

SCAIMagineering*

Imagineering is delivering the essence of engineering in a practical way ... and inspires young people to reach out to the world of work..."

Encouraging today's young people to be tomorrow's engineers

The UK's economic future depends on enabling children to be creative, inventive and technically able to support wealth-creating activities. The Imagineering Foundation is providing valuable links between education and manufacturing across the UK and provides valuable opportunities for manufacturers and engineering organisations of all kinds - including SMEs - to invest in the engineers of the future.

An independent education charity, the Foundation introduces young people to the exciting world of science, engineering and technology through fun, hands-on activities and personal involvement not only at public events but also in weekly after-school Imagineering Clubs. The Clubs are aimed at 9 - 13 year olds, where pupils make a series of working engineering projects from kits using simple tools while learning the engineering and science principles behind these projects and their everyday applications.

44

Imagineering is a superb way to show young people the world of engineering. As a major engineering employer we recognise our responsibility to help young people understand where their science, maths and technology studies could lead them."

Ways to invest

- Supporting an Imagineering Club, using the specially-developed kit programme
- · Releasing engineers to run Clubs
- Supporting development projects
- Participating in Imagineering's public events

Rewards and benefits include

- Developing engineers of the future who will support UK economy
- Promoting your own organisation
- Boosting recruitment programmes
- Fulfilling Corporate Social Responsibility programmes
- Professional development of employees
- Personal and leadership development of staff
- Promoting engineering in general

Imagineering Clubs make a lasting impression on young minds and Imagineering shares our aim of getting young people excited about engineering and crucially to encourage them to make the right subject choices at GCSE-level and beyond."

Imagineering is a highly successful initiative with a proven track record for sustainability and quality. It is designed to develop and hold young people's interest and influence them in a positive way to make informed choices about the subjects they study and the career path they ultimately choose.
