

BLOODHOUND ROCKET CAR BODY AND NOSE CONE

1. Cut out the profile along all continuous lines.
2. Using the back non-cutting edge of scissors and a ruler as a guide, lightly score along the dash lines.

3. Bend the flaps inwards along the dash lines which you have scored.
4. Glue along the tapered end where indicated to form the Nose Cone, clamp until glue sets.

5. Fix the Body and Nose cone to the chassis blocks front and rear with double sided sticky pads
